Additional Information

The following pages contain more information on both the iLearnU online program catalog and the registration platform.

Collier County Public Schools took on the initiative to design and develop a Professional Development & Learning online catalog and course management system, "iLearnU".

Together, the catalog and online platform contain a description of the district's professional learning opportunities, an intuitive calendar, registration, evaluations and data analysis.

iLearnU was entirely developed using internal district resources, giving flexibility and control on design and implementation, which allowed us to easily adhere to the latest standards, statutes and policies.

What is it...

- As the iLearnU online program catalog was intended to serve as a tool to better prepare staff for their professional future, the concept “Become the Architect of your Professional Future” evolved into the overall theme of the publication. The catalog categorizes all professional learning opportunities into five sections:
 - State Requirements
 - Maximizing Professional Opportunities (includes content area training)
 - Is Leadership in Your Future (includes leadership development programs)
 - Building a Solid Foundation (includes customer service training)
 - Leadership Opportunities (includes district-wide trainings)
- Each section includes a description of the programs/courses available, as well as interactive links to course calendars, informational websites, brochures, and program admission applications.
- The iLearnU catalog was launched as an interactive e-book publication on the CCPS district website in April 2014. It was re-launched to include the new CCPS logo and updated information in March 2015.

What is it... continued

- The e-book format allows for an aesthetically organized way of delivering information with embedded links allowing for external documents (i.e. calendars, etc) to be updated without the need to re-publish the entire catalog. It can be viewed on any device or printed as a booklet.
- Upon posting on the district website, the iLearnU Professional Learning Catalog was advertised (and continues to be promoted) to CCPS staff in a variety of ways:
 - All district staff (approximately 7,000 employees) received an “iBriefing” announcing the availability of the iLearnU catalog. The “iBriefing” platform is CCPS’ internal communication system. A reminder “iBriefing” regarding the catalog is sent periodically.
 - The Professional Development and Learning Department presented the catalog to all school administrators at Principal and Assistant Principal meetings. The presentation urged administrators to share the catalog with their school’s teachers and staff.
 - The iLearnU catalog is presented during all New Teacher Orientation sessions.
